

```
to="*"
end
style-{{ (isActive) => ({
  color: isActive ? 'blue' : 'black',
  fontWeight: isActive ? 'bold' : 'normal'
})
}}
<Home<<NavLink>
```

| Home NavLink mein end prop zarur likho — warna / har URL par active rahega kyunki /about bhi / se start hota hai.

BrowserRouter main jsx mein, poori app ko wrap karo. Sirf ek baar.

Routes App jsx mein. Ek waqt mein sirf ek Route render karta hai.

Route path+element. URL ko component se jodta hai.

Link Navigation ke liye. Kabhi-a href use mat karo.

NavLink Navbar ke liye. Active page highlight karta hai automatically.

Sequence Specific routes pehle, wildcard aakhir mein.

Navbar position Routes ke bahar — taaki har page par dikhe.
