React Assignment

SIR YASIR ALI LASHARI · MODERN WEB APP DEVELOPMENT

Enhance the Image Search App

Objective: Improve the existing Image Search App by adding important React features — practice **React Hooks**, API handling, conditional rendering, and UI development.

TASKS & REQUIREMENTS

TASK 1

Loading State ⌚

- › Show "Loading..." while API request is in progress
- › Hide it once data is loaded

useState for loading

TASK 2

No Results Found ✕

- › If API returns no images (`images.length === 0`)
- › Show message: *"No images found"*

```
images.length === 0 && // show message
```

TASK 3

Enter Key Support 🗑️

- › Press Enter to trigger search
- › Button click should also work

```
onKeyDown={(e) =>
  e.key === 'Enter' && search()
}
```

TASK 4

Dark / Light Theme 🌙☀️

- › Toggle button for theme switching
- › Light Mode (default) + Dark Mode
- › Apply CSS class switching

dark-mode / light-mode

useState for theme

TASK 5

Pagination 📄

- › Show 20 images per page
- › Next Page & Previous Page buttons
- › API param: `page: page`

useState for page

★ BONUS

Optional — Extra Marks

Disable buttons while loading

Show current page number

Improve UI design

LEARNING OUTCOMES

● React Hooks (useState)

● API integration (Axios)

● Conditional rendering

● Event handling

● Theme switching

● Pagination logic

● Real-world React apps
